Determining the appropriate price list: **Internal pricing** will only be charged in situations where internal groups host events for themselves, in which the group's members are invited and participate in the event. **External pricing** will be charged when an external organization, whether educational, cultural, professional, religious, ethnic, political, social or commercial, is given permission to use the University's license. **External pricing** will be charged in situations where an internal group is making arrangements on behalf of an external group; essentially "sponsoring" the event, such that the internal group is otherwise uninvolved in the event and the internal group's members are not invited.

Note: any event represented as an internal event will be billed at external rates should Beverage Services find it has been falsely represented at the time of booking. This decision will be made after servicing the event.
